A Guide to Creative
Colours &
Finishes

We recommend using this guide to request a painted sample from your supplier prior to placing your order

◆ Durable, beautiful and guaranteed to last

Committed to the highest standards of product quality and workmanship, we undertake a rigorous regime of quality inspections and controls, ensuring our powder coated products comply with all the requirements of the relevant British, European and Qualicoat* standards.

We are proud to back our advanced production processes with the assurance of a **25-Year Paint Guarantee**, which covers the coated aluminium against any of the following faults:

- ◆ *Peeling, powdering and blistering*
- ◆ *Corrosion except due to bending or folding after the application of the paint*
- ◆ *Chalking, fading and loss of sheen out of the Qualicoat* regulation*
- ◆ *Filiform corrosion*

◆ Reassuring quality with a lustrous finish

Our in-house polyester powder coating facilities are the most advanced of their kind in the UK.

This allows us to provide the widest range of high quality standard and non-standard colours and finishes for virtually every requirement. Each finish meets the demanding marine-grade standard*, enabling our systems to be used in even the most challenging environments.

The paint process begins in our pre-treatment area. Alkaline and acid based and 100% chromate free, this stage of finishing ensures the aluminium is perfectly prepared, ready for the polyester powder coating to be evenly and smoothly applied to the surface. The result is a beautiful, durable and low-maintenance finish.

Reflecting our commitment to sustainable manufacture, our finishing plant incorporates a number of environmental features. These include rainwater capture, allowing us to use filtered and cleaned water in the pre-treatment process, and a powder recycling system, which captures and re-uses 98% of all excess powder.

* Marine guarantee applied for separately. Qualicoat is a quality-label organisation established to maintain and promote the quality of coating on aluminium and its alloys.

◆ Choosing the right colour for your home

Having selected the finish for your project, simply speak to your supplier and they will arrange for a sample to be sent to you. This is a very important stage in making completely sure the tone and shade are exactly what you want. We have taken great care to make the colours in this brochure a close representation of the finishes available. We always recommend viewing a painted sample of aluminium before making your final decision.

Our extensive and varied range of colour and finish options provides inspiration for all types of properties. From contemporary urban homes to traditional Cotswold cottages, we have the perfect colour to suit every project in any location.

The complete range includes our ever-popular Naturals, Sensations, Cotswold and Alchemy collections, as well as the all new Creations colour palette, developed specifically to suit our range of Designer Doors.

Alchemy

Combines the best of anodised and powder coated finishes

Introducing an innovative new range of anodised effect colours that combine the unique style and aesthetics of anodising with the protective qualities of a high quality powder coated finish.
